

HW - Review Trig Graphing

p. 860 # 22-33 (skip tan questions)

AND

Sketch the following:

1) $y = -\cos\left(2\left(\theta - \frac{\pi}{2}\right)\right) + 3$

2) $y = 3 \sin\left(\frac{1}{4}(\theta + \pi)\right)$

3) $y = 5 \cos(\pi\theta) - 3$

4) $y = \sin 3\theta$
